

CTU SUMMER SCHOOL 2020

ROBOTICS & FUTURE-TECH

INTERDISCIPLINARY ENGINEERING

Experience Robotics, Autonomous Aerial Vehicles, CAD Modeling, Air Traffic Navigation, Nuclear Engineering, Biomedical Engineering

TECHNOLOGY OF THE FUTURE

Learn from top international experts by working on cutting-edge projects

INNOVATIVE LEARNING

Hands-on training, individual and team projects

INDUSTRY INSIGHT

Guided company tours

6 ECTS CREDITS

A Transformative Experience

You will gain practical knowledge in a wide range of engineering fields, all while getting hands-on experience with cutting-edge equipment and technology, guided by leading experts in their fields. By broadening your horizons and learning the value of interdisciplinary collaboration, you will earn a deeper understanding of the technology that is shaping our future. All this while experiencing the culture and history of one of the most beautiful cities in the world!

Academic Program

4-Day **Robotics Course**

3-Day Course on **Multi-Robot Systems**

2-Day Course in **CAD – Modeling in Autodesk Inventor**

1-Day Course on **Measuring Hemodynamic Parameters**

1-Day **Nuclear Engineering Program**

1-Day **Biomedical Engineering Program**

1-Day Project at the **Air Traffic Control Simulator**

Plus visits to the National **Air Navigation Services**, the **Centre of Vehicles for Sustainable Mobility**, the historic **Wastewater Treatment Plant**.

LANGUAGE

English

TARGET GROUP

Undergraduate students

LOCATION

Prague, Czech Republic

DATES

June 29 – July 17, 2020
