

Indian Institute of Technology, Bombay offers Winter school programme for December 2021 Artificial Intelligence in Education

Instructor

Prof. Ramkumar Rajendran,
Assistant Professor in IDP
in Educational Technology at the
Indian Institute of Technology
Bombay, Mumbai. His research
Interest is on learning analytics
in intelligent learning
environments (ILEs).

About the Course

This course will cover how learning analytics, which is a method to collect, measure, analyze and report data, is applied to data from learning environments. This course will cover the basics of learning analytics that are descriptive, diagnostic, predictive, and prescriptive applied to the educational dataset.

Learning Objectives

The learners will be able to collect data from the learning environments, analyze it, extract the features and apply ML algorithms using tools.

Who should Attend

Any student with basic knowledge in Computation Skills and currently pursuing his/her the third year or above or in UG or PG or Ph.D., The course is free of cost, but registration is mandatory.

Duration of the Course

Two weeks with the teaching/learning content available for thirty hours (i.e., three hours a day- 1.5 hours lecture and 1.5 hours tutorial)
